Please follow the below instruction to setup and using your doorbell device.

1. Downloading and installing the APP

Open the APP store(for IOS) or Google Play (for android) on your smart phone devices. Search "Tuya Smart"/ "Smart Life" or scan the following QR code to download and install.

App Store — Available on the iPhone

Google play — ANDROID APP ON

Tuya Smart   Smart Life

Tuya Smart

2. Setting up the APP

Before you begin…
 Make sure the Tuya Smart or Smart Life is installed to your device.
  Make sure that your devices is connected to a 2.4GHz WIFI network, not a 5GHz network.
Add the Smart doorbell

1.) First open Tuya Smart or Smart Life and click add device.

Smart doorbell
2.) Click Add Device --> then smart doorbell.

3.) Choose QR Code mode.

4.) The APP will automatically fill in the WIFI name, please input the correct WIFI password. Then click Next step.

5.) Install the battery, then check if the blue light is flashing and hear the "wait for connection" sound, click blue light has flashed.
Scan the QR code below with the camera until you hear a prompt, then tap "I Heard a Prompt".
6.) When the app show device added successfully, congratulations ! The device is ready for use now !
Note:
In crowded environment, it is recommended to close or set the device to low sensitivity to reduce device arousal and call times to extend battery life.
Be sure to turn on push notifications on your phone:
(1). Navigate to Settings --> Notinfications --> ON
(2). Alist of APPs that support push notifications will appear.
(3). Tap the Tuya Smart app and enable the notification.

3. Note for using.

1.) The device is powered by rechargeable lithium batteries. With fully charged, the battery life approx be six months. The mobile device APP will be prompted while the battery is low. Please charge the device after received the reminder.

2.) Keep the camera in range of your router.
Make sure to pick a place within range of your network. Thick or insulated doors can greatly reduce the strength of your WIFI signal even if your router is close by, so you should try streaming video before you mount your camera.

3.) The device is a low power consumption inntelligent products, can support remote wake up from the APP, PIR human detection, press doorbell wake up. The device will be works for 30 seconds after wake up then be in the resting state automatically and until to next waking up.
